HOW WE FUND PUBLIC SERVICES IN NEW HAMPSHIRE

Presented by Phil Sletten, Policy Analyst

Public Services Help Ensure Our Quality of Life
Why is Revenue Important?

- Pays for services that help make our communities stronger
- Tangible and direct:
  - Roads and bridges
  - Police, fire, and emergency medical services
  - Education (including primary, secondary, and public higher education)
  - Public health services and health insurance services for those in need
  - Cleaning trash, clearing roads
  - Parks and preserves, including federal, state, and local protected areas
- Less tangible, but very important:
  - Benefitting from an educated workforce and public
  - Protecting citizens from harm and environmental degradation
  - Long-term investments, with positive returns, made collectively
Why “Revenue”? Don’t You Mean Taxes?

- Not all government revenue comes from taxes
- Collections through fees, charges, interest, and programs that sell products or services
- Federal programs, grants, and aid supply a large amount of revenue to the State government directly, also may provide funding for local government initiatives, support for other organizations

What Revenue Are We Considering?

- The federal government collects revenue that ends up in State coffers, but that is not a focus here.

- State Revenue: money collected through New Hampshire state taxation and other sources, including grants from the federal government.
  - State tax revenue is usually the least restricted revenue, with federal grant programs and specific State fees more likely to have “strings attached.”

- Local Revenue: money collected by New Hampshire counties, school districts, and municipalities (local governments), primarily through property taxes.

State Revenue System - Strengths and Weaknesses

- Reliance on many revenue streams, most with narrow bases
- High importance of non-tax revenue sources, such as liquor and lottery sales
- Fortunes do not rise or fall with changes in a single revenue source, adds stability to the revenue system relative to other states
- Narrow bases more likely to disappear with changing economy
- Policymaker flexibility might be more limited because of narrower bases, large or many adjustments may be needed to react to changes
- Certain revenue sources likely to be declining over time, such as the Tobacco Tax and the Communications Services Tax
- Changing demographics may complicate sustainability
- Reliance on federal sources results in limited options if funding from the federal government is reduced

State Funding For Local Governments – Recent State Decisions

- Much of the on-paper dollar value is in Adequate Education Grants, less when locally-raised Statewide Education Property Tax is removed.
- Adequate Education Grants modified, stabilization aid to decline 4 percent annually starting in SFY 2017 and continuing for 25 years.
- The school building aid program has not accepted new projects since SFY 2010, with one exception.
- Since SFY 2013, State contribution to local teachers, police, and firefighter retirement costs has been suspended, was 35 percent in SFY 2009 and earlier.
- Meals and Rentals Tax distribution to municipalities set at 40 percent of revenue in law, but formula to reach that percentage has been suspended.
- Revenue sharing program has been suspended since 2010.
- Environmental grants for drinking water and wastewater facilities and landfills have been declining in aggregate.
- Highway and bridge aid funding has fluctuated over time, recently an influx of one-time funds.

State Funding For Local Governments

A Connection Between Local Property Tax Increases and State Budget Decisions?

- Local property tax rates depend on many factors
- But a logical connection exists
- And federal budget decisions could affect your local property tax bill if changes are made that influence State policymaker decisions on aid to local governments
