# Why “Revenue”? Don’t You Mean Taxes?

- Not all government revenue comes from taxes
- Collections through fees, charges, interest, and programs that sell products or services
- Federal programs, grants, and aid supply a large amount of revenue to the State government directly, also may provide funding for local government initiatives, support for other organizations

# What Revenue Are We Considering?

- The federal government collects revenue that ends up in State coffers, but that is not a focus here
- State Revenue: money collected through New Hampshire state taxation and other sources, including grants from the federal government
  - State tax revenue is usually the least restricted revenue, with federal grant programs and specific State fees more likely to have “strings attached”
- Local Revenue: money collected by New Hampshire counties, school districts, and municipalities (local governments), primarily through property taxes

## A Connection Between Local Property Tax Increases and State Budget Decisions?

- Local property tax rates depend on many factors
- But a logical connection exists
- Federal budget decisions could affect your local property tax bill if changes are made that influence State policymaker decisions on aid to local governments
