The COVID-19 Crisis and State Budget Implications for New Hampshire

Presented by Phil Sletten, Senior Policy Analyst
New Hampshire Fiscal Policy Institute

New Hampshire Funders Forum
Winter Meeting
December 7, 2020
Key Takeaways

▪ Granite Staters with the fewest resources have seen the most extensive impacts from the COVID-19 crisis. The long-term economic effects may be substantial.

▪ Exact State Budget impacts not yet clear; the loss of revenue may be significant, although the forecast has improved over time.

▪ With revenue shortfalls potentially smaller than during the Great Recession, State policymakers have resources and flexibility to preserve key services.

▪ Federal action key to outlooks for State services, the economy, and the well-being of low-income families and individuals.
The COVID-19 Crisis and Household Finances

U.S. Census Bureau surveys of New Hampshire adults show approximately:

- 47 percent of households lost employment income between March 13 and the July 2-21 survey (the last survey that asked this question)
- 28 percent of respondents indicated it has been somewhat or very difficult to pay for usual household expenses during the pandemic (November 11-23 survey)
- 24 percent of respondents expected a loss of household employment income in the next four weeks (November 11-23 survey)
- 12 percent of households sometimes or often did not have enough food in the prior seven days (November 11-23 survey)

Medicaid approximately $2.1 billion last year, more than half federal funds; health coverage for low income individuals, long term care, mental and behavioral health

Health and Social Services also includes federally-funded Food Stamp/Supplemental Nutrition Assistance Program benefits, cash assistance grants, child care assistance, child protection, housing supports

Education funding primarily state-funded grants to local school districts, including targeted aid for districts with more students from families with low incomes

Dollar value of the State Fiscal Year 2020 Medicaid program, which includes on- and off-budget expenditures, reported by the Office of Legislative Budget Assistant.
State policymakers have most flexibility over General Fund dollars, primarily generated from State tax, fee, and Liquor Commission revenues.

General Fund used to ensure positive balance in Education Trust Fund, shares key revenue sources.

The Great Recession and the State Budget

Revenue Shortfalls and Federal Assistance

- The federal 2009 American Recovery and Reinvestment Act included additional aid for States through Medicaid, to education funding, and other areas (COVID-19-related shortfall aid limited to a smaller increase in federal share of Medicaid)

- While planned General Fund totals declined slightly between the 2008-2009 Budget and the 2010-2011 Budget, total appropriations grew due in large part to federal assistance

- Larger revenue shortfalls in the 2008-2009 Budget than appear to be occurring in the 2020-2021 Budget

Long-Term Impacts

- Federal aid provided less support to the 2012-2013 Budget, which declined by 9 percent relative to prior two-year State Budget; annual State Budget appropriations remained below 2011 levels until 2018

- Long, slow economic recovery that did not reach all Granite Staters equally, low and median wages in New Hampshire were outpaced by inflation during much of the recovery

Note: All years are State Fiscal Years, which begin July 1.
The Next Budget: Considerations and Complications

- The course of the COVID-19 pandemic
- Federal assistance: More fiscal aid for states? Economic aid to individuals?
- How businesses adapt and respond, important for employment and State revenue
- Does State agency spending relative to the State Budget change when federal aid no longer available after December 30th, under current policy?
- As crisis continues, will it be more like a “regular” recession over time?
- Current State Budget relies on surplus funding carried forward from prior budget to fund key components, increases risk to programs even if revenue recovers
- Timing flexibility: current State Budget can end in deficit, policymakers have two years to address needs when most acute, resolve deficits when needs are lower
Key Takeaways

- Granite Staters with the fewest resources have seen the most extensive impacts from the COVID-19 crisis. The long-term economic effects may be substantial.

- Exact State Budget impacts not yet clear; the loss of revenue may be significant, although the forecast has improved over time.

- With revenue shortfalls potentially smaller than during the Great Recession, State policymakers have resources and flexibility to preserve key services.

- Federal action key to outlooks for State services, the economy, and the well-being of low-income individuals and families.
